WORK

Toters - iOS Engineer

Toters is a very popular store delivery service based in Beirut, Lebanon. They also offer their services in Riyadh and Baghdad. I was, along with others, responsible for the development of a reinvented version of the app.

Shawbakit

Shawbakit provides a variety of affordable and delicious meals that are delivered in the form of high quality ingredients with an easy recipe to follow. I Developed the entire iOS Application that offers Meal Kits, Utensils, Healthy Snacks, etc. that get ordered and delivered to the customer.

Locast

Locast is an iOS Weather Forecasting App, designed to be accurate and real-time as much as possible, it uses METAR data from the nearest airports to present weather information.

Filefy

Filefy is an advanced file manager for iOS, capable of handling most file types. Unfortunately, Filefy was pulled from the App Store due to an unrestricted downloads feature.

Lebanon Speed Tickets

Lebanon Speed Tickets is a Utility App, targeted for the lebanese people. It allows anyone to check his/her car registration for speeding tickets.
